capability. We are uniquely able to deliver tangible outcomes because of our broad range of services, solutions and assets across Strategy & Consulting, Technology, Operations, Industry X and Accenture Song. These capabilities, together with our culture of shared success and commitment to creating 360deg value, enable us to help our clients succeed and build trusted, lasting relationships. We measure our success by the 360deg value we create for our clients, each other, our shareholders, partners and communities. Visit us at www.accenture.com

Role Overview
Join our team that improve the way our clients and the world works. Working in challenging and dynamic environments, using their versatility to create and support solutions that meet client requirements from analysis to implementation

What would you do?

App/cloud engineering
- Identify and solve issues within applications and infrastructure.
- Drive resolution of functional, technical and infrastructure issues for clients
- Guide clients with a variety of expertise (from users to admins and developers) in overcoming technology challenges
- Focus on driving automation, self-service, and evolving cloud infrastructure environments

Project control services
- Enable program management and increase the overall quality of Technology Delivery
- Support projects in the Technology Delivery Centers by tracking and managing project management office activities
- Proactively monitor, manage, report on deliverables, and solve issues

We're Online!
How may I help you today?

Low/no code app development
- Develop applications using a low-code development platform, setting up and configuring systems for each client's unique requirements
- Work with three key elements: form builders, pre-built templates, drag-and-drop visual interface, entity builder
- Research and analyze internal business processes with the scope of optimizing and automating them

Test automation engineering
- Creation of test designs, test processes, test cases and test data
- Apply business and functional knowledge including testing standards, guidelines, and testing methodology to meet the teams overall test objectives
- Responsible for designing testing scenarios for usability testing
- Prepare all reports related to software testing carried out
- Analyze the results and then submit the observations to the development team

What we need?
- As we provide service for our clients across the globe, we expect you to be flexible to work across different time zones/shifts
- You are willing to work in any Business Unit/Service line within the company
- You are willing to join /relocate to any Accenture office across India
